

Integrated Cabling Solutions[®] (ICS)

When efficient data delivery is critical and time is short, ICS from Eastern provides an integrated solution.

From critical care facilities, to apartment and office buildings, to factory floors - innovation can save time and money.

ICS provides this innovation in the ability to source and combine cable core products including fiber, UTP and coax, and provide it with flexible interlock armor, creating one high-standard, easy to install assembly.

Add optional jacketing, cable identification and sequential footage marking to the equation, and the result is protection and profitability - a win-win situation!

EASTERN

Eastern Integrated Cabling Solutions® (ICS) with Cable Protection (CPID)®

Cable Protection and Identification

- Custom interlocked armoring over any copper, aluminum, fiber optic, voice, data, coax, multi purpose cable in steel or aluminum armor
- Custom jacketing of any armored cable with PVC, high/low temperature material, zero halogen material, or other special jackets for FT-4, riser, plenum, or outdoor applications
- Identification through special colors, special jacket imprinting

Cable customization

- Custom assembly of wire, fiber, UTP, coax cables to your specification
- Composite cables for specialized applications

Cabling Solutions

- ISO 9000 certified – complete cable testing before and after processing
- An Eastern Exclusive – Key cable manufacturer's warranty maintained after customization
- Applications:
 - Factory Floor
 - Process control and instrumentation
 - Wireless communications
 - Heavy industry – Pulp & paper, mining
 - OEM, panel building

Unusually FAST turnaround for all services!
